

太福澤電線特性 TEFZEL WIRE FEATURES

線徑小

太福澤是一種非常優良的絕緣體，可設計用於薄絕緣的構造線上，裝配一大把電線不受空間小之約束。

重量輕

太福澤的比重比其他任何高溫絕緣材料低，故可減輕重量。

易於施工

太福澤在架設時，可承受任意處理電線穿過長距離的管子，不易將絕緣體擦破。

Small Size

TEFZEL is an excellent insulator, it can be used in thin wall construction. It means a large number of wires can therefore be used in a given area.

Light Weight

TEFZEL is a lower specific gravity material than other high temperature insulation material, it is therefore provide weight saving.

Easy Handling

TEFZEL is tough, it can withstand rough treatment during installation or pull longer length without breaking.
