Railway cables

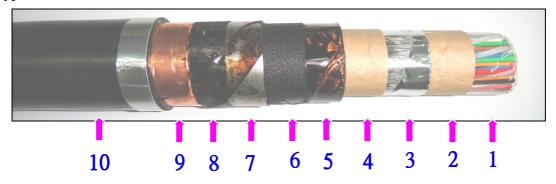

Application:

High shielded cable: Applied communications along the electrified wire, can be distinguished to filled jelly type and air type.

Wayside cable: Used in high speed railway along the track and next to the machine room of the wire.

Construction:

Air type:

• Cable core

Conductor: Solid annealed copper

Insulation: Polyethylene

Quadding: Color polyester tape

2 Covering: Paper tape3 Shield: Aluminum tape4 Covering: Paper tape

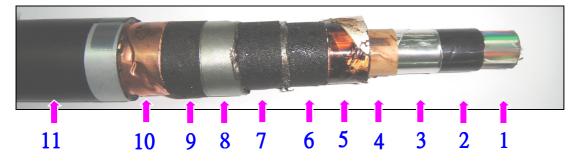

S Aluminum sheath: Aluminum tube

6 Covering: Cotton tape

7 Armour: Galvanized steel tape

3 Covering: Cotton tape9 Shield: Copper tape.0 Sheath: Polyethylene

Jelly type:

• Cable core

Conductor: Solid annealed copper

Insulation: Polyethylene

Quadding: Color polyester tape Filled jelly: Petroleum jelly

Covering: Mylar tape

2 Inner sheath: Polyethylene

3 Shield: Aluminum tape

4 Covering: Paper tape

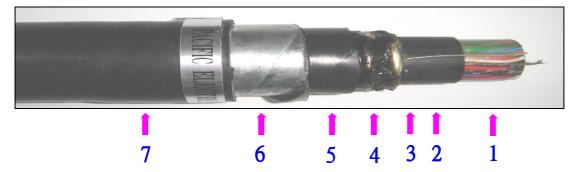

5 Aluminum sheath: Aluminum tube

6 Covering: Cotton tape

Armour: Galvanized steel tapeArmour: Galvanized steel tape

Covering: Cotton tape. Shield: Copper tape Sheath: Ployethylene

Wayside cable

• Cable core

Conductor: Solid annealed copper

Insulation: Polyethylene

Wrapping: Fire proofing tape (Suitable for Fire resistance cable)

Ouadding

Covering: Mylar tape

2 Inner shetah: Low smoke free halogen PE

3 Earth wire: Tinned copper wire

4 Armour: Corrugated aluminum tape

6 Medium sheath: Low smoke free halogen PE

6 Armour and covering: Galvanized steel tape and cotton tape

Outer sheath: Low smoke free halogen PE

Characteristic:

High shielded cable.

- ◆ Aluminum sheath, high magnetic permeability metal band covered structure, with low induced voltage
- ◆ Through the European DEMKO certification.
- Prevent communication line interference from electromagnetic induction.
- ◆ Air type high shielded cable, better air sealing of cable.
- Filled jelly type high shielded cable, better water penetration properties.

Wayside cable

- ◆ Conform to REA PE-89 electrical properties and water penetration properties.
- ♦ Sheath use low smoke free, cable by IEC 61034 \ IEC60754 \ NES 713 requirements
- ◆ Flame resistance cable by IEEE 383 or IEC 60332-3 flame resistance test requirements.
- ◆ To prevent high voltage line of electromagnetic interference.
- ◆ Fire resistance cable by IEC60331 fire resistance test requirements.

Construction:

Air type high shielded cable:

Conductor	Conductor	Cable	Aluminum	steel	Outer	Overall
diameter	diameter	core	sheath	tape	sheath	diameter
and pairs		diameter	thickness	thickness	thickness	approx.
	(mm)	(mm)	(mm)	(mm)	(mm)	(mm)
0.9×68P	0.9					
+	0.5	38.6	2.5	0.5	2.5	54.8
1.2×34P	1.2					

Filled jelly type high shielded cable:

Conductor	Conductor	Cable	Aluminum	steel	Outer	Overall
diameter	diameter	core	sheath	tape	sheath	diameter
and pairs		diameter	thickness	thickness	thickness	approx.
	(mm)	(mm)	(mm)	(mm)	(mm)	(mm)
0.9×28P	0.9	18.0	2.5	0.5	2.5	40.1
0.9×54P	0.9	24.5	2.5	0.5	2.5	46.4

◆ ELECTRICAL PROPERTIES

• Conductor resistance:

Conductor diameter (mm)	0.9	1.2
Max. ave. (Ω/km)	27.4	15.4
Max.(Ω/km)	29.0	16.3

2 Conductor resistance unbalance: max. $1\% \circ$ **3** High volatge test: 500V(R.M.S) for 1 min. **4** Insulation resistance: min. $20,000 \text{ M}\Omega\text{-km}$

⑤Mutual capacitance (nF/km):

	Minir	num	Maximum		
Norminal	All cables	90% of	90% of	All cables	
		cables	cables		
38.5	35.2	36.5	40.5	41.8	

©Capacitance unbalance (pF/500m):

	Limits for 90% of		Limits for remaining 105		
Item	lengths		of length		
	Ave.	Max.	Ave.	Max.	
Between pairs in quad	40	160	55	240	
Between pairs in					
adjacent quads	20	110	20	110	
Between any pair	160	650	220	950	
and earth	100	050	220	750	

Screening factor: According to VDE 0472 1983

Field strength	Screening factor			
(V/km)	60Hz	800Hz		
50	≤ 0.15	≤ 0.0025		
100	≤ 0.08	≤ 0.0025		
300	≤ 0.06	≤ 0.0025		
500	≤ 0.08	≤ 0.0025		
1000	≤ 0.10	≤ 0.0025		

Wayside cable:

Conductor	Conductor	Cable	Inner	Steel	Outer	Overall
diameter	diameter	diameter	sheath	tape	sheath	diameter
& pairs		approx.	thickness	thickness	thickness	approx.
			nom.	nom.	nom.	
	(mm)	(mm)	(mm)	(mm)	(mm)	(mm)
0.9×60P	0.9	26.4	1.9	0.5	2.5	45.5
0.9×70P	0.9	28.0	1.8	0.5	2.5	47.6

◆ Electrcial Properties

1 Conductor resistance : max. $29.0\Omega/km$ **2** Insulation resistance : min.. $5000M\Omega-km$

3Dielectric strength: D.C. 500V/1 min. (core-core)

D.C. 10KV/1min. (core-shield)

◆Mutual capacitance: max. 60nF/km

Screening factor: max. 0.6 (50V/km · 60Hz)
